

SONAE INDÚSTRIA WINS THE SONAE COMPANIES SUSTAINABILITY AWARD

It is with great pleasure that we announce that the **SONAE COMPANIES SUSTAINABILITY AWARD** was awarded to **SONAE INDÚSTRIA «REWOOD PROJECT»**, which was developed by **Tafisa Canada**. This prize recognizes the implementation of measures that strengthen the sustainable development of all Sonae Companies and distinguishes the best projects that reconcile the economic, environmental and social aspects.

This project made it possible to recycle 244 1000 tons of wood fibre per year, the equivalent of more than 2 million trees. Furthermore, it helped preserve more than 100 jobs and create 41 new recycling centres with 445 workers.

Sonae Indústria is committed to becoming an exemplary company, able to provide to its customers the most advanced wood-based panels, and to actively manage the social, environmental and economic impacts.

Congratulations to the winners.
